

Step By Step

Here's how Blue SOC's phishing subscription works.

1 Choose the plan

Choose your plan in "Plans & Pricing" menu and receive 14-day free trial. Manage your subscription in the "My Subscriptions" in the site menu (login required).

Remember to fill in the "Subscription Questionnaire" in the site menu (login required).

2 Details confirmation

We will email you to confirm a few details (e.g. the email addresses that our phishing campaign will test).

3 Phishing launch

Our phishing campaign will launch 4 times a year. Phishing emails will be sent from our registered domains.

Each campaign will last for 1 week.

4 Reporting

A report will be ready to share after each phishing campaign finishes (2 weeks lead time). The report will include statistics such as number of people who clicked phish links, submitted data, etc.

Click [here](#) for our report executive summary sample.

5 One-on-One Session

Most of our subscription plans come with consulting session(s).

It is a One-on-One session with our security consultant who will start with understanding your company background. We can then discuss about any follow-up items in your phishing campaign, or other IT security topics that can enhance your company's security.

You can book the session in the site menu (login required).
